PARQUE EÓLICO VIENTO PACÍFICO VERDE

APÉNDICE 1.6.4 ESCENARIO ASTRONÓMICO REAL. CALENDARIO ANUAL DE MINUTOS DE EXPOSICIÓN DIARIA A SOMBRA INTERMITENTE DE LOS RECEPTORES.

Report created by the FlickerShadowMeteo program V 3.0

Developed by Hidrotools Ltda.

Report Date: Sat Jan 31 18:22:48 2026

CASE : Realistic-case
Sun is not always shining during the day (cloudy days)
The rotor will not be turning all the time (no wind)
The rotor blades will not always be perpendicular to the sun-receptor view line (wind direction)

Annual maximum minutes : 164 (2h:44)
Maximum daily minutes : 47 (0h:47)

Report created by the FlickerShadowMeteo program V 3.0

Developed by Hidrotools Ltda.

Report Date: Sat Jan 31 18:22:48 2026

CASE : Realistic-case
Sun is not always shining during the day (cloudy days)
The rotor will not be turning all the time (no wind)
The rotor blades will not always be perpendicular to the sun-receptor view line (wind direction)

Annual maximum minutes : 0 (0h:00)
Maximum daily minutes : 0 (0h:00)

Report created by the FlickerShadowMeteo program V 3.0

Developed by Hidrotools Ltda.

Report Date: Sat Jan 31 18:22:51 2026

CASE : Realistic-case
Sun is not always shining during the day (cloudy days)
The rotor will not be turning all the time (no wind)
The rotor blades will not always be perpendicular to the sun-receptor view line (wind direction)

Table 2: R945 receptor shadow time in daily minutes
